

Nutanix on OVHcloud

Explore the Nutanix on OVHcloud solution — our scalable hyperconverged (HCI) platform that is ready to use in just a few hours. Offering two types of service — a packaged service or the BYOL (Bring Your Own Licence) service — our solution combines Nutanix Cloud Platform software licences with a dedicated, Nutanix-qualified OVHcloud Hosted Private Cloud infrastructure.

- Nutanix-qualified Bare Metal Servers: High Grade – HCI servers, equipped with Intel Xeon Gold processors
- Nutanix cluster deployment in just a few hours
- Hosted Private Cloud infrastructure with HDS certification

KEY BENEFITS

CONFIRMED SECURITY & COMPLIANCE

- ISO/IEC 27000 certifications & HDS certification
- Data sovereignty and operational sovereignty in Europe and Canada
- Hosts maintained 24/7 in OVHcloud datacentres

EASY ADOPTION

- Pre-deployed clusters available in a few hours
- No long-term commitment
- 2 types of solutions to answer various use cases and needs:
 - ✓ BYOL service: licence portability for transparent application migration
 - ✓ Packaged service: private dedicated infrastructure & software licence included

COST CONTROL & COMPETITIVE PRICING

- OPEX model
- 27 models of Nutanix-qualified High Grade - HCI servers, equipped with Intel Xeon Gold processors
- Ingress & egress traffic included
- Private network vRack included

SUSTAINABILITY 'BY DESIGN'

- Carbon Usage Effectiveness **0.20T** CO₂e/MWh in 2022
- **1.28 PUE** & **0.26 WUE** (L/kWh IT) indicators in 2022
- Optimized server lifecycle

EXPERTS AT YOUR SERVICE

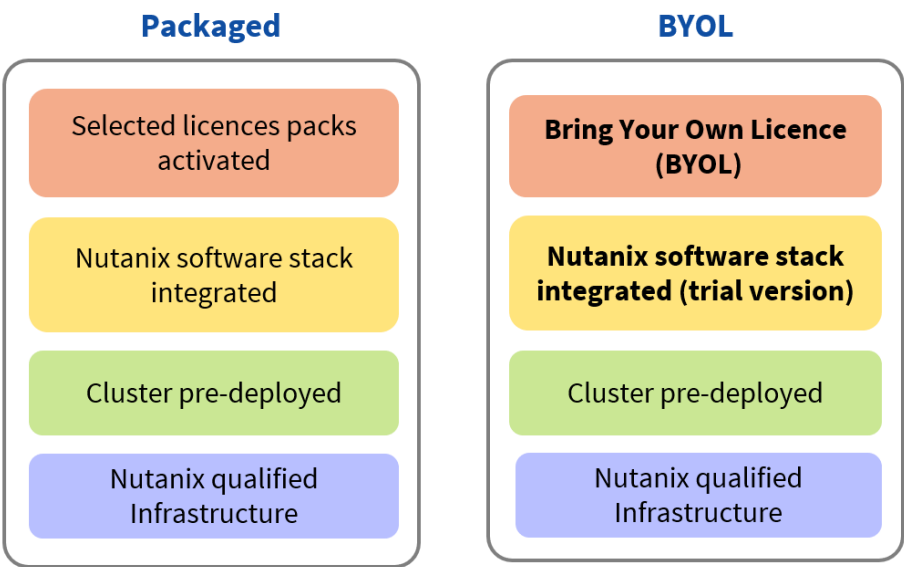

- Our Professional Services experts and Customer Service teams are always ready to provide you with the support you need, anytime.

OUR SERVICES

The Nutanix on OVHcloud solution is a ready-to-use HCI platform, offering packaged or BYOL services, based on OVHcloud high-performance hardware.

Build your Nutanix cluster with our Nutanix-qualified High Grade Intel (HGR-HCI-1, 2 and 3) dedicated servers (min. 3 up to 15 servers/cluster).

Designed and optimized for hyperconverged infrastructures, these servers offer robust computing power, a very high bandwidth network (up to 50Gbit/s on the private network), and SAS SSD storage, to ensure that your

PACKAGED SERVICE

The Nutanix on OVHcloud packaged service is an all-in-one Private Cloud platform. Our two options — the Nutanix Standard Pack and Nutanix Advanced Pack — combine the pre-installed Nutanix Cloud Platform software licences as a bundle with a dedicated, Nutanix-qualified OVHcloud Hosted Private Cloud infrastructure. This means you get a ready-to-use Nutanix cluster in just a few hours.

BYOL SERVICE

The Nutanix on OVHcloud BYOL (Bring Your Own License) service offers full portability for your Nutanix Cloud Platform licences, and transparent application migration to our dedicated, Nutanix-qualified High Grade HCI Intel servers. Your Nutanix cluster is pre-deployed in just a few hours, and ready to use with your custom Nutanix infrastructure.

USE CASES

Move to Cloud

- ✓ Benefit from pre-deployed clusters with no vendor lock-in
- ✓ Rehost applications with Nutanix Move
- ✓ Develop your cloud-first or hybrid-cloud strategy

Disaster Recovery Plan

- ✓ Get a resilient backup platform that mirrors your infrastructure in just a few hours
- ✓ Add HYCU to gain advanced data protection and recovery features
- ✓ Activate DRP quickly without interrupting your production

On-demand Resources

- ✓ Burst into the cloud for quick ramp-up and seasonal peaks
- ✓ Rapidly deploy test environments and Proofs of Concepts (PoC)
- ✓ Turn CAPEX costs into OPEX
