OVHCLOUD AI SUMMIT 2026

The 55 launches changing our customers' day-to-day

Strengthening the cloud foundation

38

new products for compute, data, security, networking, governance, experience and private cloud.

Compute	4
Data & storage	5
Security & trust	6
Network	11
Governance & Experience	7
Private cloud & on-premises	5

Dedicated AI products

17

new products across the entire AI stack, from compute power to applications.

AI infrastructure	2
Orchestration & MLOps	1
AI inference	3
AI PaaS	3
AI SaaS	3
Olala models	5

in alpha

Coming soon

7

on the way

Alpha and beta features published on OVHcloud Labs. Dates subject to change.

OVHCLOUD AI SUMMIT 2026

Strengthening the cloud foundation

Compute, data and security: 15 new products

● Available ● Beta ● Alpha ○ Coming soon

Compute

4 new products

Serverless Containers

Alpha

Your containers run on demand, billed per execution.

Serverless Functions

Alpha

Event-triggered functions, with no servers to manage.

Bare Metal Private Boot

Available

Boot your dedicated servers from the private network.

Media Transcoder

Alpha

On-demand audio and video conversion, at scale.

Data & storage

5 new products

Lakehouse

Alpha

Store and analyse all your data on a single platform.

Backup Center

Alpha

All your Public Cloud backups, managed in one place.

Private NAS-HA

Beta

High-availability file storage, accessible over the private network.

Object Storage · metadata

Available

A new, higher-performance metadata stack.

Object Storage Private Endpoint (S3)

Beta

Reach your S3 buckets without going over the internet.

Security & trust

6 new products

Cloud HSM

Beta

Your keys protected in a dedicated hardware module.

Confidential Computing · OCCAM

Alpha

Data stays encrypted, even during processing.

Bare Metal Encryption (SED)

Available

Hardware encryption for your server disks.

Volume CMK

Available

Encrypt your volumes with your own keys.

Anti-DDoS Customer Profiles

Beta

Anti-DDoS protection tailored to your services.

Certificate Manager & Private PKI

Coming soon

Issue and manage your certificates and your private PKI.

Alpha and beta features published on OVHcloud Labs. Dates subject to change.

OVHCLOUD AI SUMMIT 2026

Strengthening the cloud foundation

Network, governance & experience and private cloud: 23 new products

● Available ● Beta ● Alpha ○ Coming soon

Network

11 new products

VPC
Coming soon

Your private virtual network, with peering and endpoints.

Application Load Balancer
Coming soon

Distribute traffic across your instances.

Private DNS
Coming soon

Your domain names resolved on your private network.

OVHcloud Connect Edge
Available

Connect your sites to the OVHcloud private network.

OVHcloud Connect · 17 new PoPs
Coming soon

17 new points of presence worldwide.

BGP Service
Beta

Announce your own IP prefixes on the OVHcloud network.

MKS Private Endpoint
Available

Private access to your managed Kubernetes cluster API.

Site-to-Site VPN
Alpha

Connect your sites to your cloud through an encrypted tunnel.

Global Load Balancer
Alpha

Distribute traffic across regions, without interruption.

WAF
Alpha

Protect your web applications against attacks.

New WeatherMap
Available

Real-time status and traffic of the OVHcloud network.

Governance & Experience

7 new products

New console
Available

A redesigned console to manage all your services.

Developer Hub
Available

A single entry point for developers.

OVHcloud Labs
Available

Try alpha and beta products before anyone else.

Docs
Available

Redesigned documentation to find answers faster.

Cost Center
Beta

Track and allocate your cloud costs by project.

Public Cloud API v2
Available

A redesigned API for automation, including by your agents.

SMTP MailOut
Alpha

Send emails from your applications and agents.

Private cloud & on-premises

5 new products

Nutanix 3AZ
Alpha

Nutanix across three availability zones.

Private VCF 3AZ
Beta

VMware Cloud Foundation across three availability zones.

OPCP · Cloud Store
Alpha

A service catalogue for your On-Prem Cloud Platform.

OPCP · Kubernetes
Alpha

Kubernetes on your on-premises private cloud.

SNC Cloud Platform
Available

SecNumCloud-qualified cloud platform.

Alpha and beta features published on OVHcloud Labs. Dates subject to change.

OVHCLOUD AI SUMMIT 2026

Taking AI from prototype to production

17 new products, from infrastructure to applications

● Available ● Alpha ○ Coming soon

01 AI infrastructure

GPU NVIDIA B300 · Bare Metal & Public Cloud

Available

The latest-generation Blackwell GPUs, as dedicated servers or on-demand instances.

GPU NVIDIA Rubin NVL8

Coming soon

NVIDIA's new generation of GPUs, in an 8-GPU configuration.

02 Orchestration & MLOps

AI Fabric

Alpha

A Python SDK to code your GPU consumption: describe what you need in your code, and the compute power is there. No servers, Dockerfiles or Kubernetes to manage. Built with Blade.sh.

03 AI inference

Gladia Endpoints

Available

Real-time and pre-recorded speech-to-text, via AI Endpoints.

AI Endpoints · Shadow (Blade.sh)

Available

Dozens of additional models in the AI Endpoints catalogue.

AI Routers

Alpha

Route each request to the most relevant model, at the right price.

04 AI PaaS

AI Agents

Alpha

Build, deploy and monitor your agents in production.

AI Search (RAG)

Alpha

Next-generation RAG, on data that stays with you.

Gladia · Voice

Coming soon

- Real-time and async speech synthesis
- Gladia Vox: autonomous voice agents
- Gladia Agency: voice in your processes

05 AI SaaS

OVHai Workspace

Public alpha

Email, calendar, files, documents and video calls in a single app, with built-in AI.

Website Builder

Alpha

Describe your project in three sentences: your website is ready to go live.

Receptionist

Alpha

An AI-powered phone receptionist that answers and routes your calls.

Olala models

At every level: on your own GPUs, fine-tuned with AI Training, deployed on AI Deploy, consumed via AI Endpoints or built into your applications.

Olala v1.0 mini 7A1B

Available

The family's compact model, designed to run anywhere.

Olala v1.0 Translate

Available

Specialised in translation.

Olala v1.0 Summarise

Available

Specialised in summarisation.

Olala v1.0 Base

Available

The foundation model, ready to adapt to your needs.

Olala v1.0 SFT

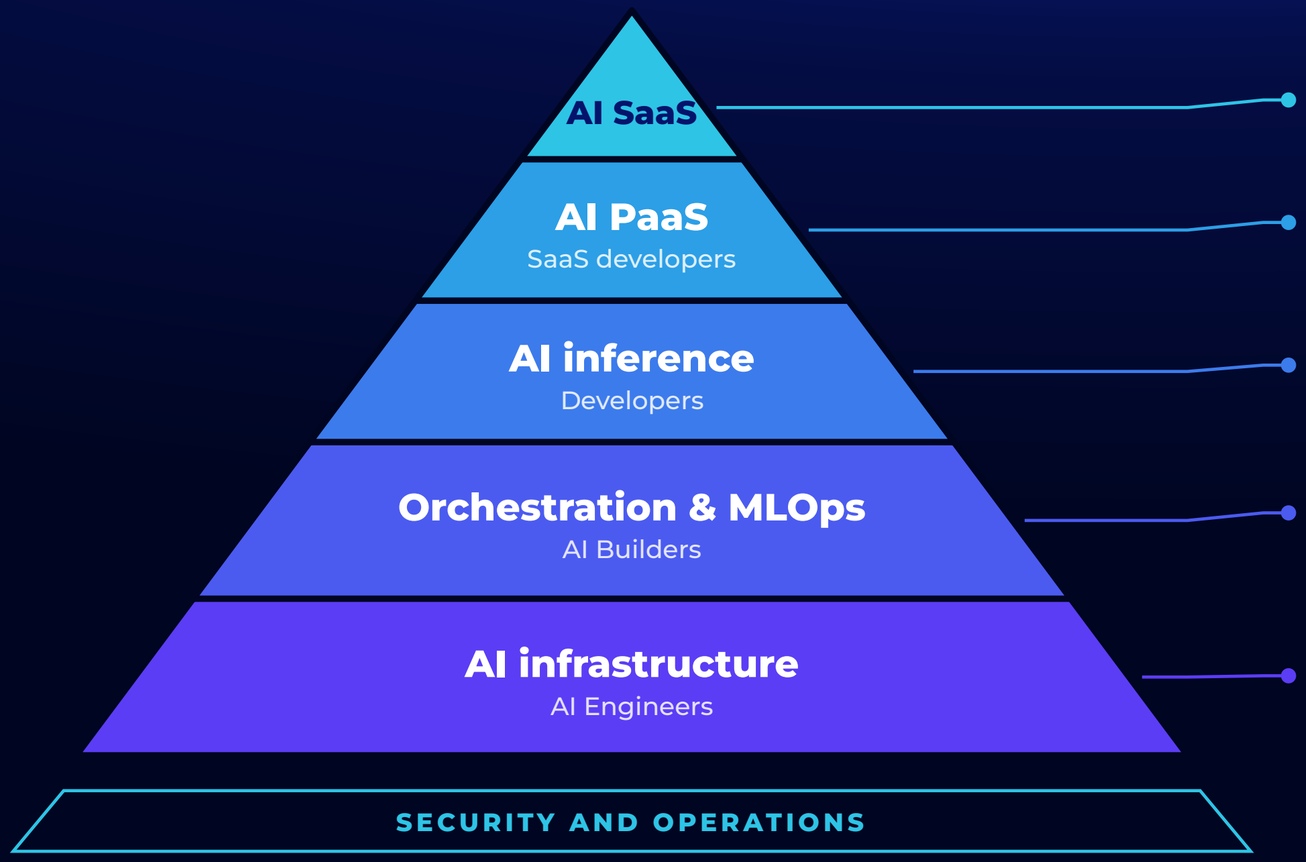

Available

The fine-tuned version that follows your instructions.

Alpha and beta features published on OVHcloud Labs. Dates subject to change.

Appendix • What's new at each level of the AI stack

From infrastructure to applications, with security and operations at every level

- **AI SaaS**
  - OVHai Workspace
  - Website Builder
- **AI PaaS** (SaaS developers)
  - AI Agents
  - AI Search
  - Console, Developer Hub, MCP Hub
- **AI inference** (Developers)
  - AI Endpoints: 100+ models, Batch
  - AI Routers
  - Gladia Endpoints: speech-to-text
- **Orchestration & MLOps** (AI Builders)
  - AI Fabric
  - Serverless Containers and Functions
  - Messaging & Events
- **AI infrastructure** (AI Engineers)
  - NVIDIA B300 and R200, RTX 6000 Pro
  - VPC, Global Load Balancer, private DNS
  - BGP Service, BYOIP
  - OVHcloud Connect: 17 new PoPs

Security and operations, at every level

- Anti-DDoS Customer Profiles
- Backup Center
- Cloud HSM
- Certificate Manager
- Confidential Computing
- Private PKI

Olala models, at every level

- Olala v1.0 mini 7A1B
- Olala v1.0 Summarise
- Olala v1.0 SFT
- Olala v1.0 Translate
- Olala v1.0 Base

Alpha and beta features published on OVHcloud Labs. Dates subject to change.
